PRACTICE WITH HTML AND CSS

Write HTML for a web site that includes at least the following elements:

- A header
- Several paragraphs of text
- A hyperlink
- A list

Now use CSS to style your web site as follows. You may need to look up CSS properties and values.

- Set the font of one item to Impact
- Center some text horizontally
- Set a background color
- Add a border around an element
- Make rounded corners on an element with a visible border or background color
- Change the default color of hyperlinks
- Adjust spacing between paragraphs (or other elements)
- Make a bulleted list with square bullets
- Make a paragraph with lots of text display as multiple columns
- Add a shadow behind some text
